

Enpowered Solutions is a service provider for the ComEd® Energy Efficiency Program Retro-Commissioning (RCx) offerings.

## IDENTIFY 5 - 25% IN ENERGY SAVINGS AT NO COST TO YOU

The RCx offering is designed to help you achieve demand and energy savings through the systematic evaluation of your systems and the implementation of low/no-cost measures. This program is offered to ComEd customers to enhance their facilities' occupant comfort, productivity, and environment, while reducing energy costs by implementing low-cost measures.

### Real, Measurable Results

Enpowered RCx Program Customers	Energy Savings (kWh/yr)	Gas Savings (Therms/yr)	Total Project Cost (\$)	Total Cost Savings (\$/yr)	Simple Payback (yrs)
Medical Office Building	1,532,295	23,909	\$6,300	\$137,737	0.05
Office Building	1,279,076	N/A	\$ 4,930	\$96,698	0.05
Hospital	703,011	21,506	\$19,576	\$66,607	0.3

## ONE OF ENPOWERED'S PROJECTS WON THE AWARD FOR MOST ENERGY SAVINGS IN 2017

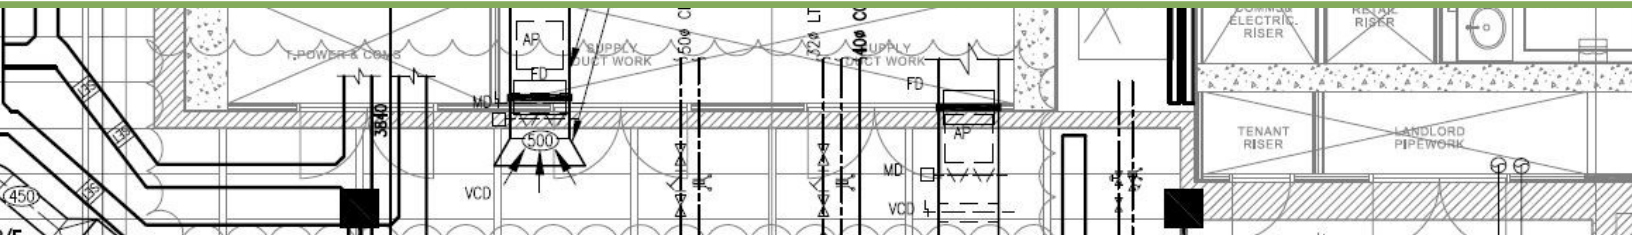

### BENEFITS

- Investigation Assessment Report
- Detailed Low/No-Cost Energy Conservation Measures for Existing Equipment
- Calculated Potential Savings and Costs
- Written Sequence of Operations
- Improved System Operations
- Building Benchmarking
- Typical Savings Range of 5%-25%

*"The team at Enpowered did a great job from start to finish. They helped us determine how to achieve meaningful energy savings at low cost and then, after implementation, validate the savings to ensure that the measures supported by the program had a positive and measurable impact. Great group of professionals to work with, always friendly and helpful. I would recommend their services to anyone looking for help in building retro-commissioning."*

**Miguel Zavala, CEM**  
Energy Manager, Facilities Maintenance

# NO-COST RETRO-COMMISSIONING (RCx) PROGRAM

## APPLICABLE BUILDINGS AND BUSINESSES

- Office buildings
- Healthcare facilities
- Large retailers
- Schools and universities
- Hotels
- Multi-family high-rises
- Theaters, museums, and clubs
- Cold storage warehouses

## SIMPLE PROCESS

Empowered's RCx Investigation and Verification Reports are your solution for strategic energy analysis. It will deliver valuable insights about your electric use, building performance, and provide cost savings tailored to your business.

You'll be able to tap into an array of energy management services from one central source and eliminate the challenge of having to determine what measures are most suitable for your business.

## ENGINEERING EXPERTISE

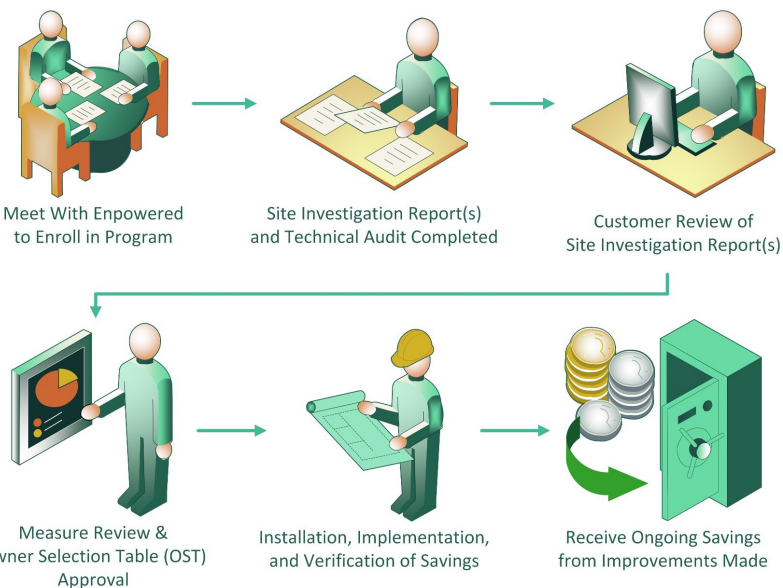

As part of the Investigation Phase, a comprehensive energy audit is performed by Empowered's top-tier engineering talent at no cost to you. An audit of this caliber typically costs \$.75 per square foot and varies based on the complexity of your energy needs.

This level of engineering expertise means that you will receive thorough results as part of the Implementation Phase so you can implement the highest value demand response and energy efficiency measures - saving your business energy and money.

### ELIGIBILITY

Eligibility is simple! Customer facilities with the following minimum characteristics may be eligible:

- » Must be located in the ComEd service territory
- » Commercial, government or nonprofit customers
- » Minimum 100kW demand
- » Willingness to commit to the implementation of measures with simple paybacks of 1.5 years or less, for some programs.

## About Empowered

Empowered Solutions, the Owner's Energy Engineer, is a leading consultative energy solutions company founded and comprised of expert energy engineers, commissioning agents, controls system designers, and project managers. We help our customers capture their performance advantage through a unique blend of controls innovation, commissioning, and energy engineering expertise.
